Questions & Clarifications for Provision of Services to Manage "Ignite National Incubation Center-Islamabad"

No.: IGNITE/NIC-ISB/2022-23/0016/Proc

- Please clarify what does company considers and qualifies as "deeptech" in Section 24.2 of RFP?
 - Deep tech startups are characterized by their focus on developing and commercializing advanced technologies that involve technological focus scientific or engineering solutions.
- 2. While measures should be taken to encourage the representation of women and other marginalised communities among the incubated founders, creating quotas of at least 25% women led startup might hurt the quality of startups. Is there any flexibility in situations where bidder do not get enough applications from female founders?
 - No, as mentioned in 24.2 and 25.4.3 (viii), at least 25% of startups inducted every year **should** be women led startups. It means one of the founders/cofounders should be a woman.
- 3. There is a confusion in section 24.5 and section 25.4.10. In section 24.5 it states 50% of accelerated startups from all NICs will be promoted to the acceleration program. (which makes it 5 startups from NIC Islamabad) and in Section 25.4.10 table point number 2 states that promotion of startups to acceleration program is up to 10 yearly. Please clarify on the criteria in detail.

As mentioned in section 24.5 that "The established setup would be an Incubator and Accelerator for startups, up to **10** out of the NICs incubated startups being promoted to the acceleration program. At least 50% of accelerated startups will be from NIC Islamabad." The requirement states that you need to promote a total of 10 startups from all National Incubation Centers (NICs), with a minimum of 5 startups coming specifically from NIC

Islamabad. This criterion is also mentioned in section 25.4.10 (2), which states, "Promotion of startups to acceleration program: Up to 10 startups yearly."

4. In section 25.4.3 and point iv, it is stated that during the last year, all 50 startups for incubation and 10 startups for acceleration would all be inducted at the same time. This would stretch the management team beyond its capacity and may lead to decline in attention and therefore quality of startups. Can the contract allow the startups to be incubated in two cohorts like the previous years?

In the last year, which is Year5, the bidder is required to incubate a total of 50 startups within a single cohort. This is based on section 25.4.13, which specifies that each startup has a recommended duration of twelve (12) months for incubation. If you will induct 50 startups across two cohorts, the final cohort would only have six months left for incubation. As a result, it is necessary for the successful bidder to incubate all 50 startups within a single cohort specifically in Year5.

5. Article 11 of the Constitution of Pakistan prohibits "forced labour". The RFP document states that the bidder will have to retain the staff for at least one year in. This is in direct contradiction to the law of the land which states that no employer can force any employee to stay at the company against their will, provided that they give a reasonable notice. This clause should be struck down as it is in direct contravention with the constitution and labour laws.

We acknowledge your perspective on this matter. However, Ignite emphasizes the requirement for you to retain the allocated resources, as outlined in your bid, for a minimum period of one year. These resources will be evaluated and graded as part of the "Proposed Project Team" section in Form B7.

6. There is a contradiction in the RFP where 25.4.1 requires the team to be retained for at least one year and Form B7-3 requires the team to sign for at least 3 years. Please clarify.

The requirements in Form B7-3 be treated as 'at lease one year'. Please consider it the same i.e 'one year' as mentioned in section 25.4.1

7. Section 25.4.3 part (ii) states that the successful bidder will have to: "Engage existing incubation resources of Ignite NIC-Islamabad e.g., curriculum, mentors/trainers' network, investors' network, startups' alumni network etc. In this regard, the Company will facilitate the successful bidder in provision of mentioned resources".
Whereas in the Evaluation Criteria of the Technical Bid, serial # 5f suggests that we will be awarded points for curriculum that is adopted from outside and is being implemented in other incubators. Please clarify this contradiction and state if the successful bidder will be required to buy the curriculum from an external party. In that case, how will the bidder ensure that the curriculum aligned with the local needs?

Since all the resources of current NIC Islamabad, including the curriculum, mentors/trainers' network, investors' network, and startups' alumni network, belong to Ignite, therefore, the incubator management of the successful bidder will have the opportunity to utilize these resources whenever necessary.

8. There are 50 points kept for international partner under Section 3e of the evaluation criteria, but it does not provide any details on the criteria. Please explain what the bidder will need to do in order to score 50 points. E.g if international partners need to be present in Pakistan etc

Details is available in Form B4-5.

9. What should be the nature of partnership with the international partner? Do we need to bring the international partner as JV / Consortium or in any other agreement?

As mentioned in Form B4-5, The bidder must include **proof of its partnership** with an International Startup Ecosystem organization (incubator/accelerator/Institutional Investor etc) and the support it will be providing to the bidder for Ignite National Incubation Center Islamabad over five years.

10. There are facilities which are provided by PMCL in NIC for e.g Lift to make the space inclusive, Mobile and data coverage with micro site because the NIC is close to sensitive security organizations and there are very weak or no mobile signals and Jazz is providing usability study lab facility to the startups. These facilities are not mentioned in the section 22 and 25.1 of the RFP. How is it ensured that the other bidders consider the cost of these in their financial proposals?

Ignite has provided the list of current fixed assets to the bidders upon request. It is now the decision of the bidders whether they wish to incorporate the cost of additional equipment or not.

11. Point number 16.3 under the section 16 is blank in the RFP. Please clarify on this.

Yes, 16.3 is blank, it's a typo, please ignore it.

12. Can international partners invest in incubated startups and get equity also?

Yes, the successful bidder or its partners may take equity in startups against their own investment only.

13. Detailed List of Assets at NIC Islamabad (With current condition mentioning if they are in good condition, need refurbishment or need to be replaced)

The attached document contains a list of fixed assets. Bidders are required to visit the site and assume responsibility for assessing the condition of the available assets.

14. Current Map of facility with detailed measurements (condition of furnishing, paint, plumbing, HVAC, electrical connections, backup power etc)

Map and measurements of the NIC Islamabad building is attached.

15. Any un-utilised space or possibility of taking over additional space at NITB

No additional space available

16. It is our understanding that the rental agreement is between NITB and IGNITE and we do not need to incorporate Rental expense in our working?

Yes

17. For the 10 selected startups for Acceleration, a grant money of Rs. 5 million will be given. Does this amount need to be built in our budget or will IGNITE Fund pay this directly?

You don't have to incorporate the grant amount into your bid since Ignite will directly pay startups the exact amount after completion of selection process and approval

18. In Mandatory Eligibility criteria it is mentioned that "Bidders currently running/managing two or more NIC Programs as Lead Bidders or three or more as JV/Consortium partners are not eligible to participate in this RFP." Our understanding is that this restriction will be applicable on consortium partners who are actually signatories to the contract with IGNITE Fund and will not be applicable to support partners? This is because even in our proposal for NIC Faisalabad we had 30 plus support partners but only 5 Consortium partners (signatories) in the contract with IGNITE. Please clarify

In this case, support partners are not part of the JV/Consortium.

19. In the financial proposal can we give detailed first year salaries and utilities but in following years have these heads on lumps basis to accommodate changing rates and especially in the case of salaries have different increment levels to acknowledge actual performance? So not everyone gets an equal increment. We believe some flexibility under these heads is required. In the case of very abnormal devaluation or increase in energy charges, the Center management may need the option to reach out to IGNITE beyond the established budgets. Please clarify?

Yes, you are required to provide a comprehensive breakdown of first-year salaries, including both full-time and part-time employees, along with any associated benefits. However, starting from the second year, the increments for employees will be based on the successful bidder's policy approved by Ignite. Regarding utilities, please provide a detailed account of the expenses that will be allocated to this category. Ensure that your budget accounts for all aspects of fluctuations, such as depreciation or increases, related to utilities.

20. Kindly provide the date of procurement of the assets so we can assess their health

The attached document contains a list of fixed assets with date of purchase.

21. let us know about the condition of the assets

Bidders are required to visit the site and assume responsibility for assessing the condition of the available assets

22. What is the KW of the generator

Generator installed at NIC Islamabad is 400 KVA
